# CHAIRMAN'S DESK

THE WILL TO WIN, THE DESIRE TO SUCCESS, THE URGE TO REACH YOUR FULL POTENTIAL, THESE ARE THE KEYS THAT WILL UNLOCK THE DOOR TO PERSONAL EXCELLENCE.

We are growing,  
Improving and changing.

With the power we derive from our history and the confidence entrusted in us, We have been growing, improving and changing with the same excitement every day from last 33 years. Undertaking new investments every year, Pursuing bigger goals in becoming a world brand, We continue to provide millions of bathroom worldwide with SONA FIELD quality.

## OUR JOURNEY

1991

Established sanitaryware manufacturing plant with production capacity of 300 pcs. per day

2003

Expanded production capacity from 300 pcs. to 900 pcs. per day

2006

Launched first time in india Hand-Crafted basin collection

2008

Launched Siphonic toilet with unique design

2010

Introduced 3D effect in Tycoon series, Two tone rustic and Exclusive printed series

2015

Launched the premium brand merida® in india

2016

4D Technology one piece closet introduced first time in india, Unique 4D Technology with rimless bowl and siphonic

2022

Installed another furnace in order to expand production capacity to 2000 Pcs. per day

## FEATURES

### 400 kg Weight Test

All wall hung WC pans can hold up to 400 kg.

### Glazed Duct and Flusher Interior

WC pans are dirt-proof, easy-cleaning and hygienic.

### Open/Close Test

All seat covers are subjected to an open/close test.

### Functional Test

All WVC pans are subjected to a 6-liters functional test.

### Stainless Steel Hinges

Seat cover hinges are produced out of water-resistant stainless steel.

### Odor Test

All WC pans are subjected to an odor leakage test.

### 3 / 6 Lt WC Pans

Saves water with 3 Ltr. consumption for half and 6 Ltr. consumption for full function.

### Soft Close Seat Covers

Soft Closing and silent special technology

### 1 Ltr. Urinals

Saves water with only 1 Ltr. of water consumption.

## SANITARYWARE GALLERY

We create leading-edge products, by combining innovative solution and excellence in terms of aesthetics and functionality. Our range is developed by soft molded shapes that slender its impressive volumes. The products have easily adoptable to modern and classic ambience and have lovely ceramic gloss finishes.

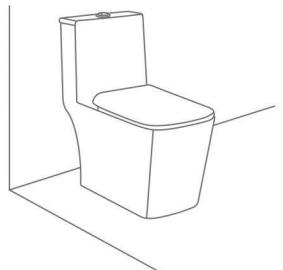

NEXT-GENERATION  
**BATHROOM**  
COLLECTION

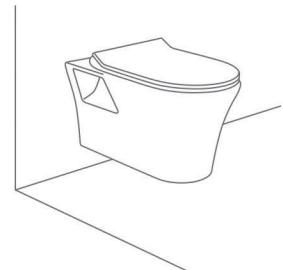

Our exquisite range of sanitaryware completes the lifestyle offering to millions of our customers across India. The elegant look, quality and style of our ceramic collection ensures that our loyal customers shall get the best in class. A perfect setting for a rendezvous with class is finally here!

This collection delivers both a compact and functional style. Its wide range enables one to optimize any bathroom space. Its modern and stylish lines make it an intelligent choice. Supporting family budgets with its 4-liter water saver one piece toilet. SONA FIELD also help save natural resources. It's prism, mercury, noyce & straton model ensure pans perform complete cleaning using just 4 liter of water.

## HOW IT WORK ?

# ONE PIECE CLOSET

### How It Work ?

In toilets, the P-trap and S-trap refer to the shape and orientation of the trap that connects the toilet bowl to the waste pipe.

A P-trap toilet has a trap that is shaped like a "P". It is a curved pipe that is designed to hold water and create a barrier between the toilet bowl and the waste pipe. The water in the P-trap prevents sewer gases from entering the room, as the gases are unable to flow back up through the trap. P-trap toilets are more common in modern construction and renovations, as they are more effective in preventing odors and are easier to maintain.

An S-trap toilet has a trap that is shaped like an "S". This type of trap commonly used in plumbing systems. S-trap toilets have a straight pipe that connects the toilet bowl to the waste pipe, and the trap is formed by a bend in the pipe just below the toilet bowl. While S-trap toilets can be easier to install in certain situations where the waste pipe is located in a different position than where the toilet will be placed. The bend in the trap allows for more flexibility in positioning the toilet, which can be useful in older buildings or in situations where the plumbing system is not easily adaptable.

In general, S-trap toilets are the preferred option due to their ease of maintenance, while P-trap toilets is a design that work effectively.

COUPLE SUITE CLOSET

---

The collection includes a toilet with a round & square shape and carefully designed dimensions that provide a new twist on the classics of bathroom furnishings. These toilets feature quality fixtures and fittings with a sleek and streamlined image.

## HOW IT WORK ?

# WALL HUNG CLOSET

## How It Work ?

Common in European bathrooms, wall-mounted toilets started gaining popularity in the India as well as for good reason. There are numerous advantages to use them, both in terms of used space and practicality and design overall. But first let's discuss a few general details.

So what is a wall-hung toilet and what makes it special? Their main distinctive feature which differentiates them from floor-mount toilets is the fact that the water tank is concealed behind the wall. It still remains accessible through the flush plate opening but stays out of view or you can use flush valves as well which are directly connected to the main water line to the bathroom. The bowl is mounted to the wall and the plumbing is connected to the water tank inside the wall.

Wall Hung Toilets comes with Quiet close seat, Quick Release, Easy to Clean, High-profile, concealed design makes cleaning easier and creates a sleek and smooth look.

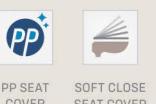

In addition, the concealed water tank also keeps the bathroom simple and easier to coordinate with the rest of the home, if you've chosen a minimalist, contemporary design. It's a really great way of getting rid of big eyesores in this case since you can also conceal the water outlets and other elements of the toilet.

Another advantage is that wall-mounted toilets make cleaning easier. Since they're not attached to the floor in any way, cleaning the space underneath is considerably easier.

# TABLE TOP BASIN

## Exploring The Types Of Wash Basin

Choosing the Perfect Basin for your bathroom can be a difficult task, given the range of choice in the market today. Here's a little guide to select bathroom basins to help you on your way.

### How Do I Choose A Bathroom Wash Basin Sink?

The right bathroom basin sink for your home will largely depend on the layout of your current bathroom. There are a few key things you'll need to consider:

- The size of your bathroom.
- The location of other fixtures such as your toilet and shower.
- The location of your existing basin plumbing.
- How you want your sink to look.
- Budget

### What Size Bathroom Wash Basin Do I Need?

There is no real standard or average size for a bathroom sink. The size you need will be dependent on how much space you have in your bathroom and how you want your basin to look.

If you're fitting a basin in a bathroom, you would want something small & compact. If you're fitting a sink in a large family bathroom, you'll have a much greater range of sizes to choose from. If you're looking to install a table top or counter top wash basin, pay close attention to the size of your vanity unit to ensure the basin will fit.

---

With a blend of spheres and arcs, the contemporary style of the SONA FIELD wash basin lavatory integrates perfectly in the modern bathroom. A new version that expresses the potential of the gesture which enhances the best elegant and harmonious design of the collection. A strong yet natural identity that while using the new material is a valuable ally for the overall interpretation of the project.

#### ACCESSORIES

#### TECHNICAL SPECIFICATION

#### SPECIFICATION OF 'SONA FIELD' PRODUCTS

Characteristics	IS 2556-1-1994	SONA FIELD Test Value
Surface Blemish	Should conform to Norms	In Conformity with the Norms
Water Absorption %	0.5 Max. Mean Value	0.1 Max. Mean Value
Modulus of rupture (M.O.R.)	60 Mpa Min. Mean Value	70 Mpa Min. Mean Value
Crazing Resistance 0.34-0.37 Mpa	10 Hrs. Min.	20 Hrs. Min.
Chemical Resistance	Should conform to Norms	In Conformity with the Norms
Staining & Burning Resistance	Should conform to Norms	In Conformity with the Norms

#### INSTALLATION & MAINTENANCE TIPS

- Install Wash Basins with or without pedestals on CI Bracket with Rag Bolts. If Wash Basin is large in size install on pedestal screwed to the floor.
- Install Wall Mounting E.W.C. with the help of CI chair.
- Install Floor Mounting E.W.C. Screwed to the floor.
- Avoid using cement at the hollow bottom portion of E.W.C.
- Regular cleaning with dry cloth / mild detergent is recommended to avoid stains & if required diluted hydrochloric acid may be used.
- Do not use hard bristled brush for cleaning so as to avoid scratches.

NOTE : Installation is advised to be done by experienced plumber well versed with latest type of fittings.
